REPORT ON WORLD AIDS DAY

World AIDS Day, observed globally on **1st December every year**, serves as a vital reminder of the ongoing challenges posed by HIV/AIDS and the collective responsibility of citizens to stay informed, vigilant, and compassionate. The day aims to promote awareness about the gravity of the issue and to educate the public about preventive measures necessary to curb the spread of HIV/AIDS.

To mark this important occasion, the **Red Ribbon Club of Government Degree College, Pattan**, organised a **Poster Making Competition** on the eve of World AIDS Day. The event was held on the theme **"Overcoming Disruption, Transforming the AIDS Response"**, reflecting the global call to strengthen HIV/AIDS services and ensure continuity of care in the face of emerging challenges.

Students from various semesters participated enthusiastically and showcased their creativity, awareness, and sense of social responsibility. Through their artwork, they highlighted:

- The need to preserve and build upon the progress made over the years in combating HIV/AIDS.
- The importance of transforming existing HIV/AIDS services to make them more **resilient, equitable, inclusive, and community-driven**.
- The urgency of addressing disruptions caused by **inaccessibility of services, lack of awareness, stigma, discrimination, and gaps in healthcare outreach**.

Participants also stressed the role of youth in spearheading awareness campaigns, promoting safe practices, and supporting individuals living with HIV through empathy and non-discriminatory attitudes.

The programme concluded with faculty members appreciating the participants for their informed perspectives and creative contributions. They reiterated the significance of continued awareness, preventive education, and community participation in achieving an AIDS-free generation.

The event successfully fulfilled its objective of sensitizing students and strengthening their commitment to social and public health issues.
